

Enhancing Resource Dissemination for the SCI Community

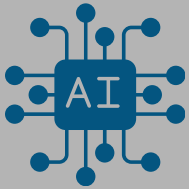

OBJECTIVE: Identify key attributes for resource dissemination solutions and features important to the SCI community.

WHY ?

Moving Beyond Static Databases

- Static databases no longer meet the evolving needs of the SCI community
- AI and LLM (Large Language Models) tools are the future
- Human-supervised systems should work alongside AI tools to ensure quality and relevance

AI Assets

Human Assets

New Generation of Knowledge

Partnering for Success

**CO-LEARNING
WITH SCI
COMMUNITY-
BASED
ORGANIZATIONS**

- ✓ Create a co-learning environment that blends technology with human expertise
- ✓ Refine systems through feedback from the SCI community
- ✓ Provide resources at your fingertips without losing the human touch
